

Kashif Rezwi

Full Stack Developer | React, Node.js & TypeScript

kashifrezwi850@gmail.com | +91 9883909187 | Kolkata, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years building customer-facing SaaS products in startup teams across React, Next.js, TypeScript, Node.js, REST APIs, MongoDB and PostgreSQL, and asynchronous workflows. Refactored a workflow-builder integration layer reused across six third-party providers, implemented a template library end to end, and built retry-resilient backend orchestration for an AI page-generation feature; supported an AppSumo launch that onboarded 4,000+ users.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Brand Exponents Creatives Pvt Ltd

Oct 2023 - Aug 2025
Remote - Kolkata, India

Swipe Pages | [Product page](#)

- Refactored and extended the Workflow Builder integration layer, making shared configuration, field-mapping, and automatic-matching patterns the common implementation path across six third-party providers (SendFox, ActiveCampaign, AWeber, Moosend, Salesflare, and EngageBay), reducing repeated mapping logic.
- Implemented the Template Library end to end: built the frontend, completed backend work started by another engineer, and integrated the API, builder handoff, and S3-compatible storage.
- Built core backend logic for the Genie AI guided page-generation feature (backend-focused, three-contributor team): executed Landing Page Builder tools asynchronously across processing layers, with retry handling and orchestration so single-layer failures did not fail generation.

Swipe One | [Product page](#)

- Developed CRM and campaign features for Contacts, Leads, Contact Properties, and email and WhatsApp campaigns across product UI, configuration, and backend processing.
- Redesigned the workflow builder with the team into a guided, template-led sequential flow, designed the MongoDB schema for the new workflow-template structure, and contributed to AI-assisted workflow generation that mapped natural-language intent into valid configurations.
- Worked with background jobs, queues/consumers, webhooks, notifications, and third-party integrations; supported the first stable release and two AppSumo campaigns (first onboarded 4,000+ users) through debugging, hotfixes, deployments, Sentry monitoring, and user-issue resolution.

Frontend Developer Intern
Nexus Software Solutions

Jun 2023 - Aug 2023
Remote - Kolkata, India

- Built responsive React and JavaScript interfaces with hooks, Redux, reusable UI patterns, and REST API integration across 2-3 client-facing applications, primarily the UBMe event-management product; implemented CRUD interactions and WebSocket-based real-time chat, and refactored frontend code for readability, maintainability, and performance.

SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux, TanStack Query, Tailwind CSS

Backend and APIs: Node.js, Express.js, NestJS, REST APIs, WebSockets, SSE, webhooks, background jobs

Data and async systems: MongoDB, PostgreSQL, Prisma, Redis; working knowledge of ClickHouse and RabbitMQ

Testing and delivery: Jest, Vitest, Cypress, Git, Docker, GitHub Actions, Vercel, Render, Sentry

PROJECTS

Code Review Agent (Personal project) | [GitHub](#) | [Live](#)

Built a full-stack AI code-review tool for pasted code and GitHub PRs (Next.js, NestJS, TypeScript, PostgreSQL, Prisma) with GitHub OAuth, review history, and follow-up chat; implemented BullMQ/Redis jobs with SSE-streamed structured reviews, multi-agent PR analysis, ESLint, and RAG over custom coding standards (pgvector); deployed via Docker, Render, Vercel, and GitHub Actions.

Perplexity Clone (Personal project) | [GitHub](#) | [Live](#)

Built a full-stack AI answer engine (Next.js, NestJS, TypeScript, PostgreSQL, Prisma): Tavily web-context retrieval, cited answers, and Prisma models for persisted conversation threads and follow-up questions; provider-agnostic OpenAI/Groq support.

EDUCATION

Bachelor of Computer Applications | Amity University, Noida

Online / Distance | Jul 2025 - Present

Full Stack Web Development | Masai School, Bangalore

Bootcamp | Feb 2022 - Nov 2022
